The Brother Printer That Does It All

Inkjet printers are an affordable and convenient way to print photos and documents from home. The original inkjet printers became available later in the 1980s and now they have become even more advanced. Around \$70 is the typical price for these inkjets. These printers are low-cost due to the high price of the ink required. The ink sales are what really lets the manufacturers of printers to make money. Also you can read more about [Brother MFCJ615W Wireless Printer](#), which is a better version.

An inexpensive option for a printer for a small office, or the home, is the Brother MCFJ265W wireless inkjet printer. This Brother inkjet printer has a new sleek design and several features that will make the way you work enhanced. Several users are able to share on a network through the printer's wireless network interface. The fax feature enables you to fax documents without a computer. Scanning your documents is incredibly easy with this model and allows you to capture your documents. It also allows the organization of your electronic files and images in different formats.

The handy design allows the user to front load for the 4-cartridge ink system. Each one of the colors has a separate cartridge which you will appreciate. The ink comes in black, cyan, magenta, and yellow, and when the ink goes empty, only that cartridge needs to be replaced. Setting up many PCs and laptops is easy with the wireless networking interface. Saving you time is the fact that the printer can hold a maximum of 100 sheets of paper at any given time. As the tray is front loading and under the device, it is shielded from paper curls and dust.

You can print up to 33 pages a minute with black and 27 pages with color so you are able to do some very fast printing. You can easily look at images on the 1.9" color LCD display, and navigate the menu choices. With the four different function keys, just the push of a button, will let you change from copy to scan, or fax, or even image printing. There are user-friendly scanning features from the software that enables you to scan, store, and organize your files. Copying your scanned documents into the software program you want to use whether it's MS Word, or MS Excel, is very simple.

The Brother MCFJ265W wireless inkjet printer is a relatively low-priced color inkjet, multifunction machine, that is wireless, prints, scans, and faxes. It doesn't use too much power, and it is quiet and economical. The quality of printed documents is decent for daily home use. If you are a professional looking for the best printer, you might want to spend a bit more money on a higher-quality printer. But if you are looking for much better machine, the [Brother MFCJ615W Wireless Printer](#) should be your best option.
